EMINENCE AI ACADEMY

AI at Work

Use AI every day in the job you already have. No coding, no jargon.

FEE	DURATION	SESSIONS	DELIVERY
₹35,000	1 month	20	Classroom & online

YOU HAVE TRIED IT, AND THE OUTPUT WAS ALMOST — BUT NOT QUITE — USABLE

Most people's experience of AI at work is a few prompts that produced something generic, and a quiet conclusion that it is overhyped. The gap between that and genuinely useful output is not intelligence, it is technique: how you frame a task, what context you supply, and which jobs are worth handing over at all. That is learnable in a month, without writing any code.

WHAT YOU WILL BE ABLE TO DO

- Build an assistant that answers questions about your own company's documents
- Automate a workflow you currently do by hand, and leave it running
- Put a voice agent on a real phone number and hear it answer
- Add a chat agent to your company's website
- Turn a spreadsheet into an answer, a chart and a summary you would actually send
- Know what is safe to share with an AI tool and what is not

IS THIS THE RIGHT PROGRAM FOR YOU?

It is, if…

- You have a job and no intention of leaving it
- Your week involves writing, reporting, analysis or coordination
- You do not code and do not want to start
- You can give ninety minutes on weekday evenings for a month

It is not, if…

- You want to become an AI engineer — Applied Generative AI is that program
- You are looking for a technical certification to put on a CV
- You want someone to do it for you rather than learn to do it yourself

CURRICULUM — 20 SESSIONS

01	The toolkit, fast — which model suits which job, and the prompting habits that stop wasting your time
02	Your own documents, answerable — build an assistant that knows your team's policies, SOPs and product material, and learn what must never be pasted into a chatbot
03	Meetings and inbox on autopilot — notes, actions, follow-ups, triage and drafts
04	Data without formulas — take a spreadsheet to an answer, a chart and a summary you would actually send
05	Automating your work with n8n — triggers, actions, and connecting the tools you already use
06	Agents that do a job — one that reads, decides and acts on a schedule
07	Voice agents — build one that answers a real phone call
08	Chat agents — a chatbot on your company's website

This is the module outline, not a session-by-session syllabus. Order, depth and the specific tools used are adapted to each batch and to the trainer leading it.

SCHEDULE AND FEE

Monday to Friday evenings, scheduled around working hours

No prior coding experience required.

₹35,000 in total — the same fee for the Hyderabad classroom batch and the live online batch. They run as separate batches with the same curriculum, the same number of sessions and the same trainer time.
